Prabal Kumar Dwivedi
Full Stack Web Developer

Professional Summary

Full Stack Developer with over a year of experience in the MERN stack, specializing in React.js, Redux, Next.js, and Node.js. Skilled in both frontend and backend development, with hands-on expertise in TypeScript and deployment tools like AWS. Passionate about learning and implementing cybersecurity practices, and always eager to contribute to innovative projects in dynamic environments.

Experience

Threat Guardian Private Limited | Full Stack Developer — August 2023–present

- Spearheaded the development of a comprehensive Learning Management System by utilizing front-end and back-end technologies to design, implement, and optimize the LMS.
- Utilized expertise in both server-side and client-side technologies to ensure the Learning Management System met project requirements and scalability needs.
- Developed an admin panel to manage the content and administration of the LMS.

SpeakX.ai | SDE I - Full Stack — May 2023 – July 2023

- Efficiently managed and optimized the admin panel to ensure seamless operations and enhanced functionalities.
- Developed and maintained server-side APIs using Node.js and Express.js for robust and scalable performance.

Projects

Baby Bliss Live Demo Link   Github Repo Link

Next.JS · Firebase · Ant-Design

- Led the project development, ensuring smooth implementation of features and coordination among team members.
- Developed and optimized product pages using Next.js and Ant-Design for a seamless user experience.
- Implemented advanced search, filter, and sort functionalities to enhance product discoverability.
- Integrated secure authentication and user management features using Firebase.
- Collaborated with designers and other developers to ensure seamless frontend and backend integration.
